

MX20 Quick Reference Guide

1. Turn the power on. The screen will remain dark for a short time while the MX20 performs preheat and self-test operations.
2. Adjust the brightness, if necessary.
3. Check that all tests pass on the Start Up screen.
4. Press the **FN** key to view available functions.
Each press of the **FN** key will step through the lists of functions.
5. Press the "smart" key below the function label to select the desired function. Press the **FN** key again to view functions. See Figure A.
6. Once a function is selected, the function labels change to give options for that function. Press the "smart" keys below the labels to choose options. See Figure B.
7. Once a function is selected, the **Menu/Enter** key is used to give additional options.
8. Press the **Line Select** key next to the displayed option to choose desired capabilities. Some options use multiple key presses for different states for the option. Press the **Menu/Enter** key again to extinguish the option display. See Figure C.
9. Refer to the Detailed Operation section of the User's Guide for more details on each function.
